Solar Monitoring Solutions

LobbyVu – for the Big Screen!

Time for your solar site to be recognized for its contribution to your building. Cachelan has developed a plug and play media centre that easily plugs into any TV via an HDMI cable, auto loading a page that lets everyone know how solar &/ battery storage is benefiting them. This can be setup in your lobby area to openly display the site's functionality and activity.

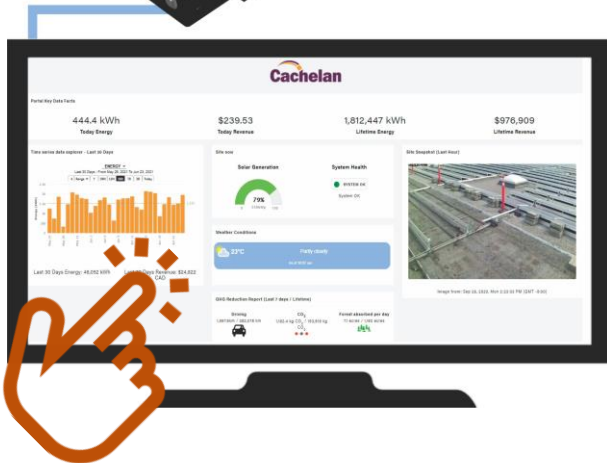

What can I display?

✓ Energy production	✓ Building Consumption
✓ Historical Data	✓ Energy Flow
✓ Positive environmental Impacts	✓ SnoCam/ Live site photos

Feel free to [view](#) a live site and check out our '[LobbyVu](#)' brochure for more displays and ideas.

How can I benefit from LobbyVu?

- Provides 24/7 active display of their site
- Plug & play hardware for just **\$350 MSRP**
- Certain displays require additional equipment
- Can be accessed with customer's own media device with a browser
- Requires active [SurePoint](#) subscription
- **Two types of displays:**
 1. Solar Generation only (FIT & behind the meter)
 2. Solar & Building Consumption Combined
